Installation between the Ride-Rite, Coil-Rite and Sport-Rite is fairly easy. For the most part, installation time varies between one to two hours. To begin, you will pre-assemble your air springs by attaching the upper and lower brackets and securing the air fitting. Most of the Firestone air bag kits will require you to remove the jounce bumper.

Firestone Air Bags, Ride-Rite Air Spring Kits for Pickups

Step 3: Undo all of the screws and remove the airbag. Press in all tabs to pull out the airbag if you don't have screws. Now we can access the plugs to fully remove the airbag. Step 4: Unplug the airbag. There will be two different connectors to undo. Make sure not to damage these, or the airbag may malfunction.

EZ Air Ride Installation Instructions

Determine whether the air suspension is just going to be in the rear or if the kit is for the front and rear. If the front is going to be addressed, remove the front struts from the vehicle as per the kit instructions. Rear coil springs should be removed if rear air springs are going to be installed. Step 3: Prepare to install the air suspension. If the kit being installed uses a compressor, the most common place to install this is in the spare tire well.
