One of the skills that's being tested during a case interview is something I call data sufficiency. Basically, you have a bunch of data and the question is do you have ENOUGH data to make a particular conclusion. This is certainly something that is tested during a live, in-person, face-to-face case interview.

Each concept is followed by the same series of questions to determine in-depth insights about each of the concepts. Some cons of a sequential monadic question are that presenting multiple concepts at a time can often increase a survey's length. Survey length can affect completion rates and can introduce risk of non-bias responses.
