EN 12600 : 2002 | GLASS IN BUILDING - PENDULUM TEST

...

Like BS EN 1279 for IG units, a European Standard on toughened glass and safety laminated glass is to be enforced. This is similar to the rules in that the manufacturer will be able to make a declaration of conformity. Recent audits of potential clients using other Third Party controlled schemes have revealed a worrying number of shortcomings.

BS EN 12150 & BS EN 12600 TOUGHENED GLASS - CENSolutions ...

BS EN 12600:2002 requires that ALL safety glazing materials are permanently marked in a position that will be visible after glazing with the following: The British Standard number BS EN12600:2002. A code to identify the material e.g. L for laminated, T for toughened (tempered), P for plastic, W for wired, SFB for safety film backed.

The comparisons between the classification systems under BS 6206 and BS EN 12600 are shown below. Both BS 6206 and BS EN 12600 use pendulum impact tests with similar drop heights and grades safety glass under one of three impact performance classifications. BS 6206 grades are 'A, B or C' with 'A' being the

highest performance grade.
