Psychotherapy notes excludes medication prescription and monitoring, counseling session start and stop times, the modalities and frequencies of treatment furnished, results of clinical tests, and any summary of the following items: Diagnosis, functional status, the treatment plan, symptoms, prognosis, and progress to date. 45 CFR 164.501.

**Progress Notes and Psychotherapy Notes**  
These notes, which capture the psychologist's impressions about the patient and can contain information that is inappropriate for a medical record, are similar to what psychologists have historically referred to as "process notes."

**More protections for patients and psychologists under HIPAA**  
Before talking about therapy notes such as SOAP notes, know this: not all therapy notes are created equal. There are progress notes and there are psychotherapy notes. Most therapists keep some form of therapy notes but they are very different and treated differently under HIPAA. Psychotherapy notes are detailed, private notes that a therapist may keep. These notes may contain observations, impressions and other details of the session.
