These engines are in their original setting in a powerhouse and are destined to remain there hopefully forever. Making electricity is probably not going to happen due to the shape of wiring and winding insulation. Besides, 2400 volts is a bit scary to me. Looking forward to seeing the video and thanks for the heads up on the 2nd 55hp

Morse Engines

The Fairbanks-Morse 38 8-1/8 is a diesel engine of the two-stroke, opposed-piston type. It was developed in the 1930s, and is similar in arrangement to a contemporary series of German Junkers aircraft diesels. The engine was used extensively in US diesel electric submarines of the 1940s and 1950s, as
