In this paper, a new type of controller based on the combined integrating systems is proposed, which is called a combined integrating controller. The controller's current output is determined only by the current input and the average value of the controller's previous output. The innovation is to introduce a time-delay positive feedback in the controller.

## **Combined Integrating Control Based on Dynamic Optimization ...**

The definition of a closed loop control system according to the British Standard Institution is "a control system possessing monitoring feedback, the deviation signal formed as a result of this feedback being used to control the action of a final control element in such a way as to tend to reduce the deviation to zero."
