Long-revered by players of all stripes, the 15-watt Pro Junior IV adds a modified volume circuit and a classic tweed appearance to this workhorse amplifier. A compact and straightforward tone machine, this amp is ideal for performing guitarists who need great tone and remarkably touch-sensitive dynamic response.

Pro Junior™ IV | Guitar Amplifiers - Fender

This Fender Acoustasonic Junior is a great performance and practice amp with built-in master reverb and chorus - it's designed for acoustic / electric instruments though it sounds great when I plug in my Strat - with dual 8" Fender Special Design speakers, it has 2 independent channels / 40 watts per channel - one very clean with string dynamics and feedback notch controls - the effects ...

Fender Acoustasonic Junior 2-Channel 2 x 40-Watt 2x8" | Reverb

if the fuse blew instantly the amp might have another problem...like when the tubes went they took one or both of the screen resistors with them. that's pretty common when tubes fail in an amp. if you aren't handy with a soldering iron you might want to take it in to get checked out. shouldn't be an expensive fix considering it takes all of ten minutes to replace, including the couple of ...

How do I change the tubes/fuse in my Fender Pro Junior ...

Fender Pro Junior The Pro Jr. is a hard Amp to beat. No it doesn't have Master Volume, Reverb, separate Bass, Mid or Treble or Tremolo. However, this little beast has "The" Best tone in my opinion than any Amp on the Market for any price. You can always add a pedal to add the above effects. Ive had so many compliments on my little Amp.
