There is a simple way to get request headers from Apache even on PHP running as a CGI. As far as I know, it's the only way to get the headers "If-Modified-Since" and "If-None-Match" when `apache_request_headers()` isn't available.

PHP: apache_request_headers - Manual

When you request a human review (e.g. appeal the current monetization status), the video gets looked at by an expert who spends time watching the video and reviewing the video's content, title, and metadata against our advertiser-friendly content guidelines.. Keep in mind that the video's icon status may change even after your video is submitted for review.

Request human review of videos marked "Not suitable for ...

Periodically check for MongoDB Product CVE and upgrade your products .: Consult the MongoDB end of life dates and upgrade your MongoDB installation. In general, try to stay on the latest version.
