How to Adjust Marker Ski Bindings. Find a Marker DIN chart. The DIN setting adjusts the tension at which the binding releases the boot. A tight setting -- or high number -- is for aggressive skiers, while a lower setting is for beginners. The wrong setting means the ski could release unexpectedly or could not release when needed.

Mounting Marker Ski Bindings - YouTube

It has Marker's Sole ID technology, which makes it compatible with normal alpine boots and AT boots with lugged soles. Because this binding is for a more advanced skier, the DIN range is higher at 6-16. That still leaves plenty of room for adjustment and will comfortably accommodate pretty much any style of skiing. It also has the inter pivot ...
