Operations Research (OR) is the study of mathematical models for complex organizational systems. Optimization is a branch of OR which uses mathematical techniques such as linear and nonlinear programming to derive values for system variables that will optimize performance. Introduction to Operation Research: The British/Europeans refer to “operational research”, the Americans to “operations research” – but both are often shortened to just “OR” (which is the term we will use). Another term that is used for this field is “management science” (“MS”).
