wires in the bay depend on what Engine management you have and if your car is CE1, CE2, Westy. Generally speaking, there are 2 bundles on the fender wall near the battery (need to take battery out to get them), a group which grounds to the back of the battery tray, a group which go to the head and/or intake manifold.

## **Ground locations on A4? | TDIClub Forums**

A very important ground on an A5 that can work loose over time is underneath the air cleaner box. It is the main chassis ground and can cause a multitude of problems if it is loose. Not sure if the A6 has the main chassis ground in the same place, but I would imagine it does.

#### **Locations - 1.9L**

My dad was an electrical engineer by trade with a lot of experience in aircraft radio design. After a series of Digifant problems he decided that the VW grounding system was not good enough so he added a #8 wire from the battery to the engine bay with stops at all the stock ground locations. Since then, no ground-related
