Hi all, I purchased a used but unused set of dies for 38/357. They are a still set of dies and appear to be in excellent condition. Well, I have maybe 6 pieces of 38 once-fired so I thought I would run them through the FL die - well lubed the cases and ran them. The primer popped and it resized them - unfortunately I think too much. The before size was right around .3845 the after was .3740.

I ordered a set of Lee carbide reloading dies for the .38 S&W and found them to be quite similar to other dies I had, as the sizing die is marked “.38 Auto.” This older .38 S&W uses the same sizing die as the .38 Super! The factory loads feature a 145- to 146-gr. lead bullet at muzzle velocities of 600-650 fps from a 4” barrel.
