Organic Pest Control - How To Make Natural Pesticides

Using Eggshells As Organic Pest Control. There is a well known organic pesticide called diatomaceous earth, which is basically the fossilized remains of creatures that are ground into a fine powder.. This works as a pesticide because it gets under the shells of beetles and acts like bits of glass to cut them up and kill them.

Using Eggshells As Organic Pest Control - Get Busy Gardening

Some organic sprays even destroy the soil microbes that help your plants grow. So, while these sprays are safer for human consumption, that doesn't mean you want to spray your plants with anything. Using all of the best pest prevention methods drastically reduces the chances you will ever need to use pesticides, homemade or not.

One key tenet of organic gardening is to increase the soil's organic matter content. A soil's organic matter consists of plant and animal residues (e.g., animal manures, plant manures (cover crops), compost) that are either fresh, partially decomposed, or fully decomposed. Florida soils typically contain less than 1.5% organic matter.
