Engines - Turbine / Garrett - Airplane Sale, Jets ...

The turboshaft engine
functions on a similar
principle as the
turboprop engine and
belongs to the

Online Library Turboshaft Engines For Sale

category of power plants which is most often used to power helicopters and hovercraft. Their advantage is the ability to take off and land vertically, therefore, their use is invaluable in areas where there are limited possibilities for landing and in particular for emergency rescue services.

These turbojet engines can also be used in a number of military applications and also for other purposes such as for Vertical Take-Off and Landing of UAV's. One of the main advantages of this turboprop engine is its light weight combined with a power thrust of 241 HP (180 kW) and its capacity to achieve flight levels of 29,500 ft. (9,000 m)
